

Decentralized Finance Capital

Through the acquisition of capital, we invest in Blockchain technology to contribute to the adoption of the technology, create financial return and do so in a sustainable and responsible manner.

Why invest with DeFi Capital

New Technology

Blockchain technology exists for just a decade. Any comparison with the adoption rates of other kinds of technology such as the television, internet or smartphones, tell us that we're still in the so-called early days.

New asset class

The creation of a completely new asset class is a development the world has not witnessed for a long time. Blockchain technology allows for exactly that.

Team experience

We have the unique position of covering almost the entirety of existence of Blockchain technology in its experience.

Target Click Strategy

We are proud to present a unique strategy specifically, applicable for this new asset class and new market. We manage risks by translating our experience and knowledge to a conservative strategy in a diversified portfolio of Cryptocurrencies and other Digital Assets fundamental in the Blockchain market.

Sustainable and Responsible

We aim to mitigate negative side effects. Our sense of responsibility and idealism has consequently a long-term approach to this developing market.
